Crop farming is the practice of growing plants for food, feed, fiber, or fuel, focusing on core steps like planning the season, testing soil, and managing growth. To learn more about how different agricultural systems operate, you can check out resources from Crop Farming.

The Core Farming Cycle

- **Plan the Season:** Choose crops, map dates, and set budgets.
- **Prep the Soil:** Test nutrient levels and pH, then add fertilizer or compost.
- **Plant and Grow:** Sow seeds at the right depth and manage water and weeds.
- **Harvest:** Gather crops at peak maturity to avoid waste. cropfarming.org +1

Types of Crops

- **Food Crops:** Grains like wheat and corn, plus fruits and vegetables.
- **Cash and Feed Crops:** Plants grown to sell for profit or feed to farm animals. Fandom +1
